

DAUDA NASIR OMOTOLA

BACKEND & MOBILE ENGINEER

Lagos, Nigeria | nasirdaud2015@gmail.com | raregazetto.me
linkedin.com/in/nasir-dauda-729357361 | github.com/awun8191

PROFESSIONAL SUMMARY

Backend and Mobile Engineer specializing in Python, FastAPI, and Flutter, with experience building APIs, cross-platform applications, document-processing pipelines, and engineering automation tools. Built a RAG ingestion system processing 2,000+ PDFs into 1M+ semantic chunks and Python utilities for Huawei FTTH geospatial data. Experienced with AWS, GCP, Cloudflare, PostgreSQL, and AI-powered systems.

TECHNICAL SKILLS

Languages: Python, Dart, TypeScript, JavaScript, SQL

Backend & Mobile: FastAPI, Pydantic, Flutter, React, REST API design

Data & AI: PostgreSQL, Firestore, Redis, ChromaDB, RAG, Vector Search, OpenCV, Gemini API

Cloud & DevOps: AWS, GCP Cloud Run, Cloudflare Workers, Docker, GitHub Actions, Git, Linux

Geospatial & Telecom: XML, KML/KMZ, Google Earth Pro, Huawei FTTH, ODN 2.0/3.0

EXPERIENCE

Omnicom Solutions | FTTH Engineering & Software Automation Intern

Apr 2025 – Apr 2026

Huawei Telecommunications Subcontractor | Nigeria

- Developed Python tools to parse Huawei FTTH KML/KMZ designs and export network assets, coordinates, cable lengths, spans, and pole specifications into structured CSV reports.
- Modelled Xboxes, Hub Boxes, FATs, and distribution cables as software objects, reconstructing FTTH topology from Huawei naming conventions and geospatial data.
- Implemented Haversine-based cable validation to compare recorded cable lengths with geographic endpoint distances and associate cables with connected network assets.
- Supported Huawei ODN 2.0/3.0 deployment through design interpretation, site surveys, route verification, field documentation, daily reporting, and project-closure reporting.

NUESA, Afe Babalola University | Technical Secretary

2025 – Present

2025/2026 Administration | Ado-Ekiti, Nigeria

- Led technical operations and documentation for the engineering students' administration, coordinating digital initiatives, technical events, and communication workflows across nine departments.
- Supported the development and administration of academic platforms used to organize engineering learning resources and student-facing services.

SELECTED PROJECTS

RAG Document Ingestion Pipeline | Python, ChromaDB, OpenCV, Docker, Gemma 3

2025 – 2026

- Built an automated ingestion pipeline that processed 2,000+ PDFs into 1M+ semantic chunks using a hybrid EasyOCR and Gemma 3 transcription workflow.
- Implemented OpenCV-based orientation correction to reduce OCR failures caused by rotated pages and image-heavy documents.
- Containerized the ingestion workflow with Docker for repeatable deployment and continuous document processing.

Engineering Hub | Flutter, Firebase, Gemini API, Cloudflare

2025 – 2026

- Built a cross-platform engineering study platform with over 100 downloads, supporting nine departments, 130K+ multiple-choice questions, and adaptive learning workflows.
- Integrated Gemini-powered features and deployed serverless application services through Cloudflare for distributed, low-latency access.

Academia (NUESA LMS) | FastAPI, React, PostgreSQL

2025 – 2026

- Designed a three-layer learning management system for textbook delivery, AI-assisted content generation, and peer-review workflows.
- Developed a FastAPI backend with 20+ REST endpoints and a PostgreSQL data layer for academic content and workflow management.

EDUCATION & CERTIFICATIONS

B.Eng. Electrical and Electronics Engineering | Afe Babalola University

2021 – 2026

CGPA: 4.34/5.00 | Second Class Honours, Upper Division

Fundamentals of Deep Learning – NVIDIA Deep Learning Institute (DLI)

Python Development Certificate – The App Brewery (London)
